SUMMARY

Enthusiastic and dedicated front-end developer with a passion for creating user-friendly and visually appealing web experiences. Proficient in HTML, CSS, and JavaScript,React JS with hands-on experience in building responsive websites. Excited to leverage my technical skills and creativity to contribute to dynamic development teams. Eager to learn and collaborate while bringing innovative solutions to real-world challenges.

PROJECTS

ChatGTP-Clone-React API

https://github.com/Tharun0730/Chat-Gpt-clone

Project Overview:

- The ChatGPT API Clone with React.js project is an innovative endeavor focused on recreating the functionality of OpenAI's ChatGPT through a user-friendly and interactive web interface built with React.js. The goal is to develop a seamless integration with a ChatGPT-like API, allowing users to engage in dynamic conversations with a virtual assistant..
- As a React.js developer on this project, your primary responsibility is to design and implement the user interface for the chat application. This involves creating components, managing state, and ensuring a responsive and visually appealing frontend.
- Establish communication between the React.js frontend and the API, handling requests and displaying real-time responses within the chat interface.

Netflix-Clone-Front-End

https://github.com/Tharun0730/Netflix-clone

Project Overview:

- Developed a Netflix clone front-end using HTML, CSS to replicate the user interface of the popular streaming platform.Technologies Used: HTML, CSS, and media queries for responsive design.
- Designed and implemented navigation allowing users to interact with the site as if it were the real Netflix platform.
- Utilized Flexbox and Grid layouts for efficient structuring of content and alignment of elements.
- Employed media queries to ensure the site adapts seamlessly to different screen sizes and orientations.

Travel-Website-Front-End

https://github.com/Tharun0730/Travel-website

Project Overview:

- Created a responsive and visually appealing travel website using HTML and Css. Designed to provide users with an immersive experience and easy navigation.Developed the entire front-end interface, ensuring cross-browser compatibility and responsiveness.
- Implemented a clean and intuitive user interface design to enhance user experience.Incorporated interactive elements such as dropdown menus, image sliders, and hover effects.
- Dynamic landing page showcasing popular travel destinations with high-quality images and brief descriptions.
- Responsive design techniques to ensure compatibility across various devices.
